

A project that was built that year was an "improved hailing ramp". This was basically a wooden seqiane-type rampover which the boats (on cradles) were dragged out of the water. The project out \$73.17 for himsets, prikes, sails, and grease. Labor was domated by Club members. At this time it was learned that the Governor had a large fund for improvement leaves and the second of the second project of the project of the project of the second project. This would become a major improvement leave.

The year 1944 started with the stated prime objective or entithilities a club hours. The previous year a member has offered to build a Carbibosae on size for \$5,000. The Building formal stardy had been desired years of \$15.00. The Building formal stardy had been desired to the proper start of the proper formal stardy had been desired to the proper start of the proper formal stardy had been start of the proper start of the proper full power to proceed in negatiations with the MDC. The presentation had not presented able period per start of the proper an area that most interested the club. The presentation includes asked to of shalling that would be such that a carbibosom for asked to of shalling the words the such less a carbibosom for asked to the proper start of the present start of the present

After establishing a budget goal of \$10,000 for th Clubhouse, \$200 was authorized for architect's plans. A pla was put forward to sell shares of stock to the membership is raise approximately \$15,000. Shortly thereafter, the Buildin Committee was able to report that an architect had bee retained and that a 29 x 35° Cape Cod style building would commonwintable \$10.000 fisished or \$5.000 unfaished.

In turther reading of the old minutes for that year we find the first reference to a problem that is still not quite solved. The Boat Yard Committee reported that four boats had been broken into and asked for more men to stand watch. They suggested a sign be posted offering a reward of "\$25 for arrest and conviction of trespassers".

As time went on the Building Committee and the architect completed their plans for the proposed Clubbouse. The first plans for the Clubhouse were to erect it on the other side of our present driveway. The entrance was off of Charles River Road and the structure was located much nearer the street. Community opposition (which we will talk about late) caused the move to the present location which at that time was heavily

The architect made a presentation to the membership and explained all the details involved and answered questions. The Chairman of the Building Committee then recommended that the Club apply to the MDC for a lease on land adjacent to
